

Clermont Medical Center
Welcome to your Wellness Visit!

A Wellness visit is a visit with your doctor that your insurance company allows once per 12 months; some insurance companies allow it once per calendar year. **It is our office policy for every patient to have a wellness visit at least once per year.**

On this visit, your doctor may address issues such as:

- Health maintenance
- Preventative care
- Preventative vaccines
- Screening for tobacco
- Alcohol use
- Depression

If applicable, your doctor may order preventative testing such as:

- PAP smear
- Mammogram
- Bone density screening
- Colon cancer screening
- Prostate cancer screening
- Routine lab work

Other screening tests may be considered based upon your medical history.

Please note that if any other non-wellness related issues such as medication refills, lab results, test results and any new symptoms that are addressed or noted at your Wellness visit, we will bill your insurance that applicable charges associated with addressing these issues at your Wellness visit. This means that if your insurance plan requires co-pay, if you have a deductible to meet or have co-insurance, you will be responsible for this payment at check in.

If you do not want to be responsible for the charges listed above, please schedule a separate appointment to address any non-wellness related issues.

By signing below, I have read what is expected of me with regards to Wellness Visits and non-related Wellness Visits and agree to pay any additional charges as listed above.
